

7.3 Institutional Distinctiveness

Our esteemed institution, apart from being committed to the mission of providing good education, strongly believes in promoting social & human values very much needed in the present scenario. Now the world is being shattered due to Covid-19 pandemic and nobody knows how and when we can overcome this problem. We are very much aware of the fact that as the torch-bearer of the light of life, we, the teachers, students and staff-members of the college should come together and try to impart the values of humanity amongst the stake-holders as well as the slum dwellers and down-trodden people around the college. This, we believe, is our institutional distinctiveness during the period of present crisis. We consider that our foremost task in these days is to run various campaigns and assistance programmes throughout the year amongst all stake-holders and common people to fight against Covid-19 pandemic so that they can keep themselves and others safe and in good health. Keeping the NEW NORMAL situation in view, we are also going to set up Virtual Classrooms and promote Online teaching and other institutional activities.
